Allowable Subject Matter

1. Claims 1-10 contain allowable subject matter over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a data reproduction apparatus for reproducing audio data from a recording medium. The independent claims identify the feature of "when the audio data of the first period of time recorded every said first period of time is reproduced every second period of time, the second period of time being different from the first period of time, outputting the audio data with the number of items of sampled audio data being converted into the number corresponding to the second period of time, the sampled audio data being reproduced every said second period of time". The closest prior art, Ishii et al discloses a conventional audio reproducing apparatus for reproducing audio data from a recording medium, either singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ishii et al discloses a conventional audio reproducing apparatus for reproducing audio data from a recording medium.

Tanaka et al discloses a digital signal transmitting and receiving system for serial data which can be easily decoded.
